Application/Control Number: 10/784,955

Art Unit: 3682

#### **DETAILED ACTION**

This action is responsive to the amendment filed 11-17-2004, which has been entered. Claims 11-21 are currently pending.

#### **Drawings**

1. The informal drawings are accepted for examination and are subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. The correction will not be held in abeyance.

### Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kondo (6,099,425). Kondo discloses a front derailleur comprising a fixed member (30) mounted to the frame of the bicycle (14) and including first and second mounting flanges (50, 52); a chain guide for shifting a chain of the bicycle, a linkage assembly comprising a first link (81) pivotable coupled to the fixed member at a first pivot axis, a second link (34) pivotable coupled to the first and second flanges at a second pivot axis, a third link (66) coupled to the chain guide and movable coupled to the first and second links to form a four bar linkage member. Kondo does not disclose that the second flange has a longitudinal dimension along the pivot axis at least about 45.0 millimeters and the

Application/Control Number: 10/784,955

Art Unit: 3682

first pivot axis being spaced less than about 5.0 millimeters from the center of the frame and the first and second flanges have different axial widths. It would have been obvious to one of ordinary skill in the art the time of the invention to modify the device of Kondo to obtain the claimed ranges, since it has been held that where the general condition of the claimed are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skills in the art. In re Aller, 105 USPQ 233.

## **Double Patenting**

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 11-21 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-13 and 15-21 of copending Application No. 09/991,880. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent

Application/Control Number: 10/784,955

Art Unit: 3682

granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: a front derailleur, a chain guide, a linkage assembly, first and second pivot links fixed member having first and second mounting flanges having different axial widths, wherein one width is at least about 45.0 millimeters, a first pivot being spaced abut 5.0 millimeters from the center plane of the frame portion, a third linkage assembly. Although the claims are not identical in their construction, they are obvious variations in breadth and scope.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marcus Charles whose telephone number is (703) 305-6877. The examiner can normally be reached on Monday-Thursday 7:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bucci can be reached on (703) 308-3668. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 3682

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
